

- 1 A group of 10 school children are asked to estimate the size of an angle θ° in a given acute angled triangle. These estimates, in degrees, are as follows.

84 85 77 85 84 87 86 88 83 85

- (a) Stating any assumptions you make, calculate a 95% confidence interval for θ . [5]

[illegible]

- (b)** Give a reason why the assumptions made in part **(a)** may not be appropriate in this case. [1]
